**Linear Guide Clamps**

**For Miniature Linear Guides**

Linear Guide Clamps Retaining Force (Reference): 70N~105N

For Miniature Linear Guides

Linear Guide Clamps Retaining Force (Reference): 1200N

For Medium / Heavy Load Linear Guides

### Characteristics of Linear Guide Clamp

Linear guide blocks can be locked at arbitrary positions by rotating a lever. Convenient when simple position retaining utility is needed.

*When using the Linear Guide Clamps in inclined or vertical applications, provide external means to prevent the slider from falling.*
