**Sprue Bushing Guides**

---

**SBGN**

- By using this product, tapering to the runner stripper plate will be unnecessary. It will only be necessary to machine round holes, so the machining will become easy.

---

**Precautions for use**

When assembling the sprue bushing guide and the sprue bushing, adjust the end faces of both of the actual products and then fix them in place.

The angle tolerance of the bore taper of the sprue bushing guide is controlled within the range of $+5'\text{ to }+20'$, however matching with the separately manufactured sprue bushing is not carried out, so be sure to adjust of the actual products before usage.

---

**Alterations**

- **WK**C: Adds two parallel flats on the head
- **TKC**: Changes the head thickness tolerance from $+0.2'$ to $-0.1'$

---

**Part Number**

- **SBGN20**
- **SBGN25**

---

**Specifications**

- **H**: 10, 13, 16, 20, 25, 30
- **A**: 24, 26, 28
- **G**: 0.1, 0.2, 0.5
- **L**: 15, 20, 25, 30
- **V**: 1, 20, 40
- **D**: 4, 6, 8

---

**Price and Quotation**

- **SBGN20**: 20, V14.0
- **SBGN25**: 20, V14.0
- **SBGN20**: 20, V14.0
- **SBGN25**: 20, V14.0

---

**Alterations**

- **WKC**: Adds two parallel flats on the head
- **TKC**: Changes the head thickness tolerance from $+0.2'$ to $-0.1'$

---
