### Precautions for use

- For lubrication of guide units of punch die and forming die.
- For lubrication of mechanical sliding part.

### Features

- It is a polyurea EP grease composed of molybdenum, EP additive, polymer, antioxidant and antitrust agent, which uses polyurea EP thickener and refined mineral oil having good thermal stability as its base oil.
- It has superior oxidation stability, water-proof performance, adhesiveness, heat resistance, mechanical stability, and particularly excellent extreme pressure (EP) property due to specially added molybdenum.
- Because special polymer is added, it is highly adhesive, waterproof and retentive so that it can be applied to where grease dips easily (such as vertical sliding surface).

### Precautions for use

- Inflammation may occur if it enters eyes. Be sure to wear protective goggles when it is used.
- Skins contact may cause inflammation. Be sure to wear protective gloves when it is used.
- Be sure to wear protective gloves in order to prevent hands from being hurt by container falling-down.

## MILLION GREASE

### MILLION GREASE (Polyurea EP grease)
